Yuri Beliakov

Front-end developer

My name is Yuri Beliakov, and I'm a front-end developer from Russia (Moscow). I have been doing web development since *2004*. During this time I have worked on many interesting projects for companies Netcracker Technology, Yandex, Art. Lebedev Studio. Now I'm working at Topcon Positioning Systems company.

Freelance work

The period of work	from 01/2004 to 02/2005

I started my career as a system administrator, but soon realized that I like to develop websites. During this period I worked as a freelancer and develop websites for customers, which I found myself.

Open-source projects

 [Lessmore](#) — The modern library of LESS mixins that implements cross-browser support for the CSS3 features and more

 [Autoconf](#) — Automatic generator of configs for web server nginx or lighttpd

Professional Skills

Here's a list of web technologies that I used in my work.

HTML and CSS

- [HTML](#) (XHTML)
- [CSS](#): Flexbox, Grids
- CSS Preprocessors: [Sass](#), [LESS](#)
- [PostCSS](#) Plugins: Autoprefixer, Colorguard, CSSnano
- CSS Frameworks: [Bootstrap](#), [Compass](#)
- CSS Tools: [Normalize.css](#), CSS Reset, CSScomb

JavaScript (ECMAScript)

- Libraries: React, Lodash, Underscore, Modernizr, jQuery
- Frameworks: Angular, Vue
- MVC Frameworks: AngularJS, Backbone
- Compilers: TypeScript, Babel
- Module loaders: Webpack, Browserify, RequireJS
- Code quality tools: TSLint, JSLint, JSHint
- Testing frameworks: Jasmine, Mocha, Protractor

Other

- UI Frameworks: Material UI, Clarity, jQuery UI
- Web Components: Shadow DOM, Custom Elements, HTML Templates
- HTML APIs: Geolocation, Drag and Drop, Web Storage
- Development methodologies: BEM
- Data Formats: JSON, XML
- Protocols: HTTP (Restful API), WebSockets
- Technical documentation: Markdown, JSDoc, DocBook
- Graphics: SVG, Canvas, Icon Fonts
- Version Control Systems: Git, GitHub, Subversion
- Package Managers: npm, Bower
- Automation and Task Runners: Gulp, Grunt, Make
- Template Engines: Jade, Mustache, Swig, Closure Templates, FreeMarker, Velocity, XSLT
- Back-end technologies: Node.js
- Databases: MongoDB, MySQL
- Web-servers: nginx, lighttpd, Apache
- Regular Expressions
- Browser Debugging Tools: Chrome Dev Tools, Firebug
- Project Management Software: JIRA
- UX Design Software: InVision, Axure, Sketch
- Image Editing Software: Photoshop, Illustrator, Gimp, Inkscape

My favorite editors: WebStorm and Sublime Text.

👤 About me

I love my job and always try to learn something new. My favorite technologies are HTML, CSS and JavaScript. But I'm also interested in all technologies and tools associated with web development.

Languages

- Russian – Native
- English – Intermediate

Personal qualities

I think that my main quality is perfectionism. It helps me to do my job with maximum quality. At the same time, this quality sometimes prevents me to do the job quickly.

Besides work I love my family, fitness, bicycling, good movies and computer games.
